

National Energy Marketers Association

Craig G. Goodman
President and CEO

Craig G. Goodman is President and Chief Executive Officer of the National Energy Marketers Association (NEMA). A former high-ranking energy and tax policy official in the Reagan and Bush administrations, Goodman is considered by many to be an expert on energy law, deregulation, taxation and public policy. Mr. Goodman represents the association before regulatory commissions and legislatures, at both state and federal levels, on the deregulation, restructuring, and taxation of natural gas and electricity as well as the implementation of all forms of advanced energy and powerline technologies.

Goodman has been a leader in the energy industry through five industry deregulations starting with oil and refined products in the late 1970s, the natural gas markets in the 1980s and is currently attempting to bring price and technology competition to the smallest energy consumers throughout the country. Goodman has published widely and has appeared as an expert on national energy, technology and tax policy issues on national television news programs, radio and print media.

NEMA is a national, non-profit trade association representing wholesale and retail marketers of natural gas, electricity as well as energy related products, services, information and advanced technologies throughout the United States, Canada and the European Union. NEMA members include global leaders in the development of enterprise solution software for the management of energy-related information and risk, as well as enterprise-wide management and financial performance. NEMA members also include suppliers and developers of advanced metering, power line communications and electricity information services, applications and technologies.

NEMA intervenes across the country to help state and federal regulators and legislators to devise fair and effective ways to implement the competitive restructuring of electricity and natural gas markets. NEMA and its members are committed to helping federal and state lawmakers and regulators to implement a consumer-focused, value-driven transition to a reliable, price and technology competitive retail market for energy. In addition, it is clear the critical information needed to create new and innovative products, services and technologies is also needed to update/upgrade and harden America's critical infrastructure for the 21st Century.

Mr. Goodman is admitted to the bars of the states of Texas and Florida, as well as Washington, D.C. and the U.S. Supreme Court. Mr. Goodman received his bachelor's degree in economics with honors from the University of Maryland and a juris doctorate degree with a concentration in international corporate law and economics from the University of Miami School of Law. His hobbies include biblical archeology, art and antique collecting, and classical numismatics.
